

# Mizuna™

## Imazamox herbicide

### Group 2

470 g (4 x 117.5 g solu-packs)

Clearfield® Canola	2 to 6 leaf
Clearfield lentils	2 to 6 leaf
Clearfield sunflowers	2 to 8 leaf

### Weeds Controlled Broadleaves

Cleavers  
Cow Cockle  
Green Smartweed  
Lamb's quarters  
Redroot pigweed  
Round-leaved mallow

### Staging

Cotyledon to 4 leaf  
(except where indicated)  
(1 to 4 whorls)  
Russian thistle  
Shepherd's purse  
Stinkweed  
Volunteer canola  
Wild Buckwheat  
Wild mustard

### Grasses

Barnyard grass  
Green foxtail  
Japanese brome grass  
Persian darnel  
Volunteer barley  
Volunteer canary seed

1 to 4 true leaf

Volunteer durum wheat  
Volunteer spring wheat  
Volunteer tame oats  
Wild oats  
Yellow foxtail

### Application rates

Mizuna herbicide	11.7 g/ac (29 g/ha)
Adjuvant	MSO Concentrate with Leci-Tech 1% v/v Merge® surfactant 0.5% v/v

### Water Volume

Ground application only	40 L/ac (10 gal/ac)
-------------------------	---------------------

### Mixing order

1. Use a 50 mesh (or coarser) filter screen and fill tank 3/4 full with correct amount of water. Start and continue agitation throughout mixing and spraying.
2. Add the required amount of Mizuna® herbicide water-soluble bags directly into the sprayer through the tank opening and allow to dissolve completely.
3. Agitate for at least 10 minutes to dissolve the herbicide. If using a tank-mix, add the correct amount of second herbicide and continue agitating.
4. Continue Agitation while adding the required amount of MSO® or Merge® adjuvant. If excess foaming occurs, a silicone anti-foaming agent may be added.
5. Complete filling the tank to the desired level with water. If agitation is stopped for more than 5 minutes, re-suspend spray solution by full agitation prior to commencing spraying again.
6. Between loads of tank-mix, check in-line and nozzle screens and rinse clean if needed.

### **Application tips**

Rainfastness – 3 hours.

Avoid application immediately before or after frost or during unseasonably cold weather.

Treat when weeds are actively growing.

Use higher water volume on dense weeds and thicker canopies.

### **Pre-harvest interval**

60 days after application for Clearfield canola and Clearfield lentils.

70 days after application for Clearfield sunflowers.

### **Follow crops**

*3 months after application:*

Winter wheat as a rotational crop

*1 year after application:*

Canary seed

Canola (all types incl. Clearfield canola)

Chickpeas

Durum wheat

*2 years after application:*

Mustard (condiment type only)

### **Tank mixes**

Please refer to herbicide label for approved tank mixes.
