

Momentum™

CUSTOMIZED BROADLEAF WEED CONTROL

Move over old standards...MOMENTUM® herbicide raises the bar for broadleaf weed control for wheat and barley growers. With its tank-mix flexibility, MOMENTUM provides unparalleled tailor-made performance, especially on those tough-to-control broad leaf weeds like Canada thistle, cleavers, wild buckwheat and kochia.

CROPS

- Wheat (spring, durum)
- Barley

ACTIVE INGREDIENTS

- Fluroxypyr - Group 4
- Clopyralid - Group 4

WEEDS CONTROLLED

- Canada thistle
- Cleavers
- Kochia
- Volunteer flax
- Wild buckwheat

PACKAGING AND APPLICATION RATE

- Each 8.99 L jug of **MOMENTUM** treats 20 acres (0.45L/acre)
- 2 x 8.99 L jugs per case

APPLICATION TIMING

- Apply to crop from 3-leaf to just before flag leaf

WEEDS SUPPRESSED

- Stork's-bill

WATER VOLUME

A rate of 10 gallons of water per acre is recommended

RAINFASTNESS

Rainfast for **MOMENTUM** is 6 hours. When determining the rainfastness of your tank mixture, review the rainfastness of all products. The rainfastness of your mixture will be the limited by the product with the longest rainfastness period.

TANK MIXES

To broaden the spectrum of broadleaf weed control, **MOMENTUM** should always be tank mixed with MCPA, 2,4-D or Refine® SG. Read the product label for mixing instructions.

- Avert / Assert*
- Everest 2.0*
- Foothills NG / Horizon NG*
- Marengo / Liquid Achieve*
- Simplicity*
- Traxos*
- WildCat / Puma Advance*
- Varro*

TANK MIX COMPATIBILITY

Not all MOMENTUM's broadleaf partners and grass products are compatible.

Do not tank mix MOMENTUM with these grass herbicides:

	GRASS HERBICIDES
MOMENTUM + 2,4-D Ester 700	Traxos
MOMENTUM + Refine SG	WildCat / Puma Advance / Marengo / Liquid Achieve

APPLICATION RATES

	MOMENTUM (JUGS)	BROADLEAF PARTNER (JUGS)	ACRES PER PACKAGE	LEAF STAGING
MCPA Ester 600 High	4	3	80	3-leaf to just before flag leaf
MCPA Ester 600 Low	2	1	40	3-leaf to just before flag leaf
2,4-D Ester 700	2	1	40	4-leaf to early flag leaf
Refine SG	2	1	40	3-leaf to just before flag leaf

TANK MIXING INSTRUCTIONS

Tank-mix instructions are determined by the tank-mix partner(s). Please refer to all product labels or consult your local CPS retail.

USE RESTRICTION

- Grazing and pre-harvest intervals: review all labels used in your tank mixture and use the most limiting
- DO NOT use MOMENTUM alone
- Do not harvest treated crop within 60 days after application

NOTE: Do not seed field peas for at least 10 months following treatment. Very dry soil conditions following application can result in a risk of injury to field peas the following year. If severe drought conditions are experienced during the months of June to August inclusive in the year of application, delay seeding field peas for an additional 12 months (total 22 months following application).
